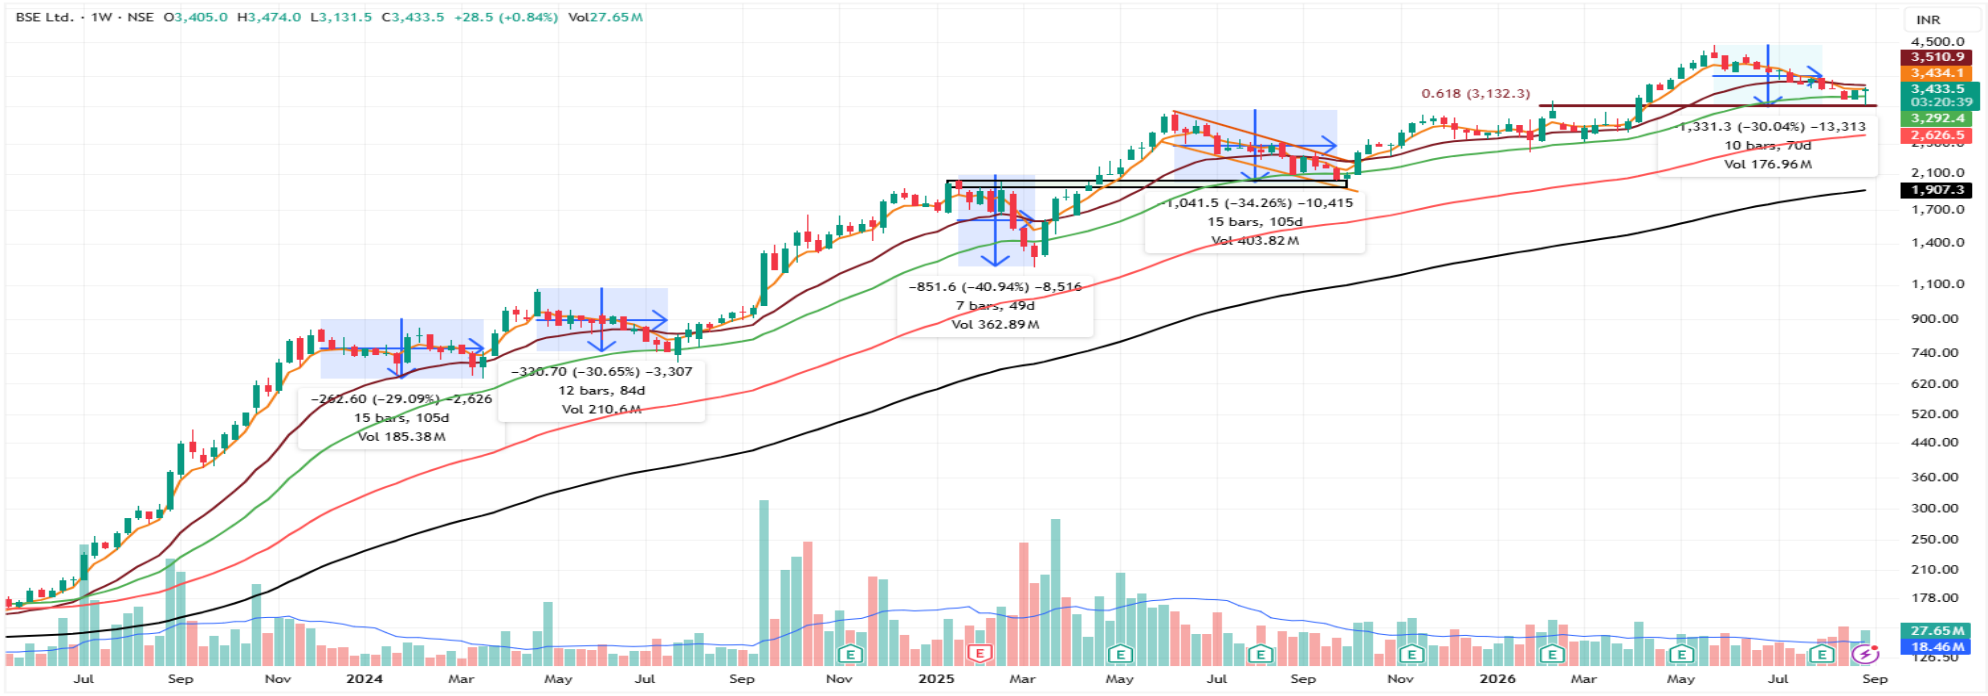
GEPL

Janmashtami Special Pick

Sept 04, 2026

BUY BSE @ 3447 TGT1 4000 TGT2 4900 SL 3150 (Exp Retn 42.15%)



BSE - SPOTLIGHT!

- The stock has shown a bullish technical setup across multiple timeframes. On the daily chart, it has broken out of a falling channel and rebounded from its 200-DEMA, indicating improving momentum.
- On the weekly scale, the stock has formed a bullish candlestick with a long lower shadow, highlighting strong buying interest from lower levels. The reversal is supported by the 50-week EMA and 61.8% Fibonacci retracement zone.
- Interestingly, the monthly chart highlights a repetitive pattern of price- and time-wise correction. Since December 2023, the stock has undergone nearly 30% price correction along with around three months of time correction. The current setup suggests that this corrective phase has completed, positioning the stock to resume its primary upward trajectory.
- **The stock is poised to maintain a positive bias, with 4,000 as the first upside target and 4,900 as the second target. A stop -loss is placed at 3,150 on a closing basis, while any correction toward 3,300 - 3,250 would provide an attractive accumulation opportunity.**
